

# 2m x 50m, Standard Debris Netting

Technical Data Sheet Dec 2017

Standard Debris Netting Material Specification	
Material	High Density Polyethylene (HDPE) - Rot resistant
Surface Weight	50 g/m <sup>2</sup>
Mesh	Triangular mesh
Colour Range	
Melting Point	130° C
Softening Point	120° C
UV Treatment	Stabilisation through Ciba-Ceigy process @ 120KLY possible @ 500KLY
Manufacturing	Woven
Composition	Monofilaments
Construction	Øyarn/warp by inch: 0.155mm/6 Øyarn/weft by inch: 0.155mm/10
Breaking Strength	350 kg/m <sup>2</sup>
Efficiency	35% Windbreak - 30% Shading
